

Professional Development Modules

About the modules

The Centre for Community Child Health with funding from The RE Ross Trust is developing a series of professional development modules. The titles of each module are listed overleaf.

The target audience in each module has been designed to enable a facilitator/leader to deliver 3 hours of professional development.

All materials required to deliver the professional development activity is provided on a CD ROM. This includes:

- Facilitator/leader notes outlining teaching strategies and timing suggestions,
- Overhead/powerpoint presentation,
- Video clips,
- Handouts,
- Reference materials/background reading, and
- Evaluation form

Accessing the modules

These modules in a CD ROM format can be accessed in two ways:

1. Completing the expression of interest form overleaf requesting to purchase the product/s
2. Completing the expression of interest form overleaf requesting to attend training to enable you to deliver the module. You receive a copy of the CD ROM as part of this training

Purchasing the professional development modules in CD ROM format

Please send me further details outlining the content, ways in which the materials on the CD ROM can be used, and the purchase costs for the following modules:

- Understanding the underlying factors influencing child health and development and family functioning.
- Family Centred Practice – an introduction
- Identifying and responding to child and family needs
- Community Centred Practice
- Service delivery and collaborations – what works
- Diversity and inclusive practices
- Implications for services for young children and their families - conclusions

Attending training to enable delivery of the modules

Please send me further details outlining the content, ways in which the materials on the CD ROM can be used, costs (including the CD ROM), and training dates/venues.

- Understanding the underlying factors influencing child health and development and family functioning.
- Family Centred Practice – an introduction
- Identifying and responding to child and family needs
- Community Centred Practice
- Service delivery and collaborations – what works
- Diversity and inclusive practices
- Implications for services for young children and their families - conclusions

**This series of CD ROMs will be released throughout 2004.
The first 2 are available from mid June.**
